AUM and Deposits (CZ+SK) at Glance

Dynamic growth of mutual and pension funds continues

Assets under management and deposits rose Y/Y by CZK 89.9 bn (+ 14 %).

The growth was driven mainly by mutual funds and pension funds which both have grown by 30 % (CZ and SK in total).

Within mutual funds in CZ (+33 % Y/Y), the sales of capital guaranteed funds were again extremely good. AUM in CGFs increased by 77 % Y/Y to CZK 33.2 bn. Thus ČSOB confirmed its No. 1 position in the CGFs market and No.2 in mutual funds with 27.8% market share as of March 2007.

ČSOB's Shareholder Structure

KBC acquired full control in ČSOB

In December 2006, KBC Bank NV exercised its call option on 7.47% ČSOB shares held by the EBRD under a Put and Call Option Agreement dating back to the time of privatization in 1999. In June 2007, KBC Bank NV acquired the remaining 2.56 % ČSOB by the squeeze-out of minority shareholders. This operation was financed with KBC's capital surplus.

As of 30 June ČSOB's registered capital was CZK 5,105 m (EUR 178 m).

Market capitalization (as of 31/12/06):

ČSOB* = CZK 185 bn (EUR 6.6 bn); total KBC = EUR 33.7 bn

Note: * Based on squeeze-out valuation.

Other Information

Operating Income Up by 9 %, excluding real estate one-off

Operating income excluding the real estate one-off increased from CZK 14,742 m to CZK 16,060 m.

NII increased as a result of fast growing business volumes.

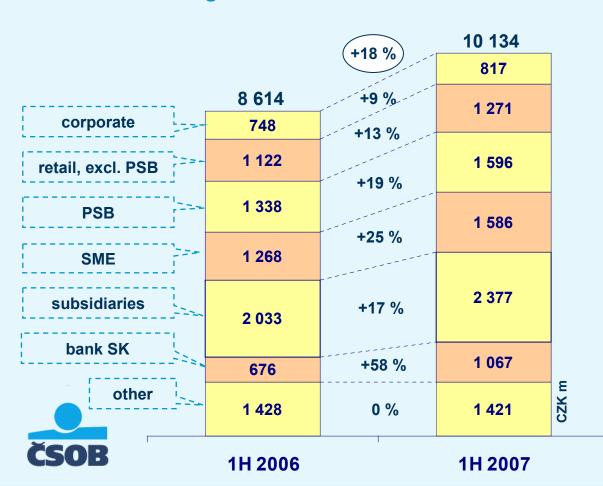

Net trading income reduction was caused by altered structure of FM operations (offset by NII) and slightly by the change in MVA methodology.

Operating income in 1H 2006 was distorted by CZK 975 m real estate one-off.

Note: * NTI = Net gains from financial instruments at fair value through P/L.

Net Interest Income

Growth in all segments continues

Net interest income increased by 18 % Y/Y thanks to good business results in all business segments.

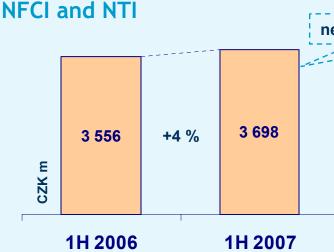

The strongest growth of NII was recorded by the Slovak branch in all segments (+58 %).

PSB is CZK 258 m above last year's 1H, driven mainly by deposits (especially current accounts). The CZK 318 m growth in SME was driven by volumes of both loans and deposits.

Item "Other NII" remained flat as the increase of interest income from FM operations was offset by the decrease related to the continuing revaluation of assets (ALM).

www.csob.cz 1H 2007 ČSOB Group Results 14

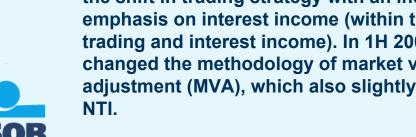

Non-Interest Income

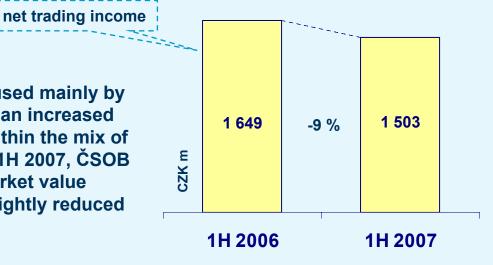

net fee and commission income

The NFCI increase was driven mainly by increasing number of transactions. The growth was, nevertheless, only 4 % as PSB dropped its fees on incoming payments.

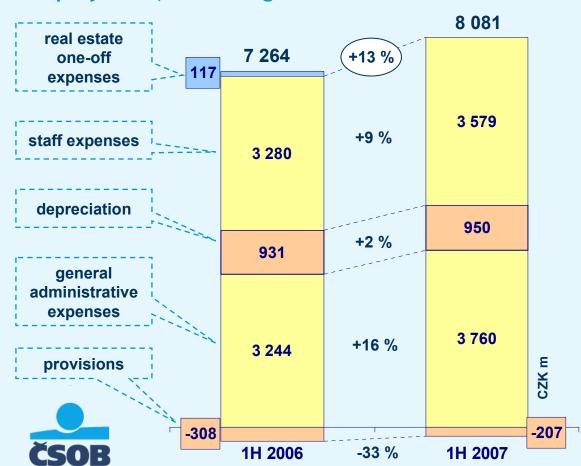

The Y/Y decrease in NTI was caused mainly by the shift in trading strategy with an increased emphasis on interest income (within the mix of trading and interest income). In 1H 2007, ČSOB changed the methodology of market value adjustment (MVA), which also slightly reduced

Operating Expenses Up by 13 %, excluding real estate one-off

Operating expenses excl. real estate one-off increased from CZK 7 147 m. to CZK 8 081 m.

The development of provisions was negatively affected by a CZK 245 m release of reserve on litigation in 1H 2006.

Increase of staff expenses was driven by growth of salaries and bonuses as a result of expanding business and by training costs.

Increase of GAE is connected especially to the change in accrual policy (Czech Post fee), the process of moving HQ to the new building, and communication expenses driven by e-innovations.

ČSOB applies a conservative approach to classification of NPLs. If at least one installment of principal or interest is more than 90 days overdue, all loans granted to the particular client are classified as non-performing.

Loan Portfolio Quality - IFRS Classification

Loan portfolio improved during 1H 2007, notwithstanding the strong growth of lending.

Note: ČSOB Group's internal classification (the system of 12 PD rating grades) is based on the newly implemented Basel 2 models. The PD ratings, applied in line with KBC Group policy, are in compliance with the ČNB's methodology.
