mixed fund

ČSOB Opatrný zodpovědný

Investing in our future

As a consumer, you can choose what products and services to buy, but as an investor, you can also directly influence a number of things. We have prepared for you **ČSOB Opatrný zodpovědný**, which which places great emphasis on the selection of responsible companies. A team of analysts and portfolio managers is looking at attractive and long-term stable investment opportunities in companies that place emphasis on environmental protection, social aspects and transparent corporate governance. The wide range of stocks and bond stocks spread across market sectors has reduced the potential risk of a significant drop in the value of the investment. ČSOB Opatrný zodpovědný offers a comprehensive investment solution for ČSOB NaMíru's responsible proposal, which will cover all the requirements of a defensive investor.

Why to invest here?

- A simple solution for beginners as well as more experienced investors.
- From 500 CZK, one-time or regularly.
- You will have the money available within 5 business days.

Tip:
Invest regularly from CZK 500 per month.

What do you invest in?

- The Fund invests (directly or indirectly) in responsible assets.
- A wide range of bonds and stocks of market sectors is represented, not only in the field of primary demand such as pharmaceutics, food and energy, but also technology, consumer durables and others.
- The distribution of the investment is managed by a portfolio manager who is guided by the long-term investment strategy of our ČSOB/KBC Group. They also track market trends for you and invest according to the current situation.

Before investing we recommend to get familiar with risks on page 2 in section What you should know.

Further information about the fund

- The fund invests in responsible assets, with issuers (such as companies or the state) being audited to ensure the responsible nature of this fund.
- These criteria take into account certain environmental, social and governance aspects according to which issuers of investment instruments are assessed. Criteria for governments concern matters such as economic and socio-economic performance, health, equality and freedom of the population, the environment and international relations.
- The fund may only invest in the assets of issuers that are among the best in their class based on these criteria. More information on the investment strategy can be found in the fund's statute on the website.

Who is the fund for?

The fund is designed for retail clients with basic investment knowledge who are aware of the risks associated with investing in conventional investment funds and their attitude to risk is:
Defensive and higher

What does that mean?

This type of client emphasizes the balance between the return potential and the volatility of the investment value. He expects a return typically exceeding the return on ordinary bank deposits.

Summary Risk Indicator (SRI): This is based on the legislation and allows comparison with other products. The indicator reflects the volatility of the fund value resulting from market developments.

1 2 **3** 4 5 6 7

Product score (PS): Allows the comparison of the savings and investment products from the ČSOB/KBC Group in terms of risk. It takes into account amongst others the volatility of the investment.

PS3 **on a scale of PS1 to PS7**

If you use portfolio investment consultancy, ask your investment specialist or your banker to evaluate whether this sort of fund would be a suitable addition to your finance product portfolio.

For detailed information on the meaning of the Summary Risk Indicator and Product Score and how they are calculated and updated, please visit www.csob.cz or contact your investment specialist or banker.

What you should know

The value of the investment may fluctuate over time and the return on the invested amount is not guaranteed. The client expects a regular return in the form of dividends or interest, and/or an increase in the investment value over time. The client expects the investment value to be preserved, or to receive regular return on the invested amount in the form of dividends or interest, or for the value of the invested amount to grow over time.

Significant risks of this fund comprise:

- Market risk, which consists in the possibility of unfavorable development of asset prices in the fund portfolio.
- Credit risk comprises a situation where the issuer or the counterparty – most often the issuer of a bond – fails to fulfill its obligation.
- The risk of inflation means the risk of depreciation of the purchasing power of an asset by rising prices of goods and services in the economy.
- The currency risk of the fund's assets in relation to the Czech crown can be hedged in whole or in part.
- There is a capital protection risk, as the fund does not provide protection for the investment made.

The fund may invest in investment securities, money market instruments, securities or book-entry securities issued by the collective investment fund, deposits, financial derivatives, liquid assets and other instruments.
